

I urge you to reject the Proposed Rulemaking # 02-230. The Broadcast Flag is not designed with consumers in mind. By passing this resolution you will be unjustly benefiting a small group of Americans at the expense of the rights of the general population. The ability to record and watch a television show at a later date is often the only way I can see the television programs which I would like to see. This law would criminalize those of us who do this with future broadcast media.

Please rule on this proposed regulation in favor of the consumers, reject the Broadcast Flag Proposal.
